

# Mike “Demo” Demopoulos (they/them)

📍 Hudson, Wisconsin, United States ✉️ hey.demo@mikedemo.email 📞 612.807.3601 🌐 in/mikedemopoulos 🌐 mikedemo.com

## SUMMARY

- Strategic partnerships, alliances, and go-to-market leader across cloud infrastructure, hosting, SaaS, and open-source ecosystems.
- Builds partner motions, opens new channels, and converts executive relationships, ecosystem credibility, and technical insight into revenue growth, market expansion, and faster execution.
- Known for identifying new markets, leading cross-functional initiatives, and aligning commercial, product, technical, and customer teams around scalable partner-led growth.

## EXPERIENCE

### Partnerships Lead, North America | hosting.com

April 2025 - Present, Remote

- Manage a portfolio of 500+ VIP and enterprise client accounts across North America, directly closing five-figure MRR growth through renewals, upgrades, and expansion activity.
- Maintain roughly 90% success across quoted renewal, upgrade, and expansion opportunities within six months of quote delivery.
- Built and tested a targeted partner outreach motion around major international events, converting agency and MSP outreach into meetings or replies with clear next steps at an approximate 80% rate.
- Translate between clients, partners, and technical stakeholders to unblock complex issues, strengthen trust, and move opportunities toward expansion, resolution, and long-term growth.
- Played a key role during restructuring by training 19 incoming CSMS, transferring account and customer knowledge, documenting processes, and informally supporting the transition across teams.
- Integrated AI-enabled workflows into research, meeting preparation, follow-up, and account planning to scale partner and enterprise account management.

### Head of Partnerships | Codeable

June 2021 - December 2024, Remote

- Opened access to new customer segments and helped shift company go-to-market direction by identifying web hosting as a strategic market beyond an initial base of major WordPress hosts.
- Expanded distribution through native WP Toolkit integrations inside cPanel and Plesk, extending reach across hosting ecosystems serving millions of sites.
- Led the cPanel / Plesk partner initiative from business case and RFP development through agency selection, testing coordination, rollout execution, and launch across 2 major hosting control panel ecosystems.
- Translated a new-market concept into an executable partner motion by aligning internal stakeholders, external partners, and technical workstreams through launch.
- Reduced applicant-to-approval time from approximately 10 months to 3 weeks for a redesigned onboarding flow handling ~1,000–2,000 applications per month, while preserving quality.

### Business Development Specialist – Product Evangelist | InMotion Hosting / BoldGrid

October 2016 - June 2021, Remote

- Directly sourced roughly 80% of qualified M&A opportunities that ultimately closed, including six- and seven-figure deal values.
- Turned major industry events into strategic go-to-market campaigns rather than passive sponsorships, frequently booking 85+ meetings around a typical major event such as CloudFest to improve access to decision-makers, partnership opportunities, and event ROI.
- Extended this event and ecosystem strategy across dozens of international events annually, aligning partner visibility, executive access, and market presence with commercial goals.
- Built trusted relationships across hosts, agencies, partners, and community stakeholders that opened pipeline, strategic opportunities, and market visibility.
- Supported product adoption through speaking, partner engagement, and visibility for native Plesk and cPanel integrations.

## PROJECT

### Applied AI Workflows / Agent Tooling | MikeDemo.dev

skills.mikedemo.dev, August 2026 - Present

- Built practical AI workflow tools for day-to-day business use, including modifications to or forks of 16 open-source AI libraries to support execution, testing, and experimentation.
- Designed browser-based and local workflow paths across 6 use cases while evaluating lower-cost and privacy-first deployment options for practical adoption.
- Applied human-in-the-loop safeguards and multi-agent orchestration across 10 distinct agents personally designed and configured to improve reliability, usability, and decision quality.

### Bugle Crowns — AWS Agentic Football Cup | MikeDemo.dev

mikedemo.dev/bugle-crowns, September 2026 - Present

- Designed and configured a 5-agent system to evaluate multi-agent orchestration, efficiency, and decision-quality tradeoffs under competitive constraints.
- Tested coordination logic and execution quality across 5 specialized agents in a large competitive field while iterating on performance.
- Captured practical lessons in multi-agent design, tool use, and orchestration through repeated competition runs.

## EDUCATION

### Web Page, Digital/Multimedia and Information Resources Design | The Art Institutes Minnesota

2005

## CERTIFICATIONS

### [No Code AI and Machine Learning](#) | MIT Professional Education

April 2025

- Building Data Science Solutions; Top 1% of cohort (per student dashboard)

### [Disney's Approach to Leadership Excellence](#) | Disney Institute
